

## **Education Review Office Comments on a Supportive Learning Environment**

We are proud of the supportive, friendly and safe learning environment we provide for our students. It has been wonderful to have this confirmed by the Education Review Office for over 10 years now.

‘Students are highly engaged in learning programmes and show particular interest and enthusiasm for the school’s integrated curriculum units. Respectful, affirming relationships with peers and with teachers are evident.’

‘Students communicate well and benefit from the nurturing environment teachers provide. They show high levels of interest and sustained on-task behaviour in classrooms.’

‘Students were highly motivated. Teachers’ skilful questioning and focused oral feedback effectively supported learning. Programmes catered well for the needs of students in a pleasant educational environment.’

‘Students explore and debate ideas. The growth of personal-responsibility and team building skills are outcomes of many learning experiences. Students are confident and articulate and regularly engage in learning conversations with each other and with teachers.’
